

Šimon Hyben

Full-Stack Software Engineer

hyben.simon@gmail.com

Bratislava, Slovakia

github.com/sHyben

PROFESSIONAL SUMMARY

Full-stack software engineer with 5 years of experience delivering end-to-end web applications in a regulated financial services environment. Proven track record of independently owning the full development lifecycle — from requirements analysis through deployment and infrastructure maintenance — across cloud platforms including Azure and GCP. Adept at modernising legacy systems, integrating AI/LLM services, and shipping production-grade solutions used by thousands of employees across Erste Group.

WORK EXPERIENCE

Software Engineer | Erste Digital, s.r.o.

Jan 2021 – Jun 2026

Innovations Department · Part-time 2021–2022, Full-time 2023–2026

Key Projects

Car Sharing Platform

- Led full-stack rebuild of the internal car-pool booking system from a legacy codebase to Kotlin Spring Boot (backend) and Angular (frontend), improving maintainability and security.
- Coordinated cloud migration from legacy hosting to Google Cloud Platform (in collaboration with HCL), containerising the application and deploying it to an internal Kubernetes-based container platform.
- Extended the system to cover management of company parking spaces at Bratislava and Košice offices, including an admin penalty & control module.
- Drove successful negotiation with the security team to enable automatic in-app VPN on company mobile devices, removing a key friction point for daily users and significantly increasing adoption.

Erste Ideas – Internal Innovation Portal

- Refactored legacy PHP backend into a modern Next.js stack and maintained the Angular frontend for a portal serving thousands of employees across Erste Group.
- Developed multiple new feature modules: employee appreciation system, peer feedback requests, best-solution competition, and a secure internal link shortener (VPN-gated, bit.ly-style).
- Managed GCP migration and all production deployments; application remains live in production today.

Digital Business Cards

- Built end-to-end tool (Vue.js frontend, Next.js backend) enabling employees to generate branded Apple Wallet digital business cards with a QR code linking to contact details or LinkedIn profile.
- Coordinated with Erste Group brand team to ensure full compliance with corporate visual identity standards.
- Solution is currently preparing for group-wide rollout to all non-Austrian Erste Group entities across Central and Eastern Europe.

KYC Modernisation – Austrian Sparkassen

- Embedded for ~9 months in a cross-functional agile team (2-week sprints) modernising the Know Your Customer process for Austrian Sparkassen banks.
- Developed reusable React components using internal George Design System libraries, designed to be adopted by other product teams across the group.

AI / LLM Integration

- Integrated custom LLM hosted on Google Vertex AI to automatically categorise receipt line items into predefined expense categories, with an active-learning loop trained on user corrections.
- Managed AI model deployments and cost governance (budgets, alerts) in Azure AI Foundry.

Engineering Responsibilities & Infrastructure

- Sole technical owner for most projects: led architecture decisions, set up CI/CD pipelines (Azure DevOps, Jenkins), managed Docker image registries on Azure Container Registry, and handled all production deployments.

- Configured MS Entra ID (Azure AD) App Registrations with custom RBAC roles read from JWT tokens for secure authentication across internal applications.
- Maintained full Azure sandbox environment: Container Apps, service connections, pipeline configuration, and Azure DevOps project/repository administration.
- Standardised team's tech stack and created reusable Angular + React project templates with Entra ID auth and Spring Boot backend starters, cutting new PoC setup time significantly.
- Mentored and task-managed 1–2 junior part-time developers; conducted code reviews and guided technical decisions.

Hackathon Organisation – Košice (2022, 2023, 2024, 2025)

- Co-organised 4 consecutive annual hackathons, each with 100+ participants; handled logistics, mentoring, and the technical activity zone (VR, robotics, gaming).
- Talent pipeline result: approximately 10 participants converted to full-time or part-time roles at Erste Digital.

IT Systems Engineer | iGuard, s.r.o.

2018 – 2020

Part-time

- Developed custom monitoring metrics for Zabbix covering Digital Audio Broadcasting, IPTV/OTT streaming, IBM Storwize 3700, and Dell Unity 300 storage systems.
- Administered Windows Server installations, processed unstructured data, and delivered functional testing for custom Linux scripts.

IT Technician / Network Support | 4 Cubes, s.r.o.

2016 – 2018 & 2020 – 2021

Part-time (2016–2018) · Full-time (2020–2021)

- Installed and configured active network infrastructure (Dell, Zyxel, Cisco, Sophos); migrated MS Active Directory user accounts and optimised data cabling and WiFi coverage.
- Provided technical support, assessed change requests, and scripted automation tasks in Linux and Windows environments.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Kotlin, Java, PHP, Python, C/C++
Frontend	Angular, React, Vue.js, Next.js (SSR), HTML5, CSS3
Backend	Spring Boot (Kotlin/Java), Next.js API, RESTful APIs
Cloud & Infra	Azure (Container Apps, DevOps, AI Foundry, Entra ID / AD), GCP (GKE, Vertex AI), Docker, Kubernetes (GUI), Jenkins, GitHub Actions
Databases	PostgreSQL, MySQL, Flyway/Liquibase migrations
AI / LLM	Azure AI Foundry, Google Vertex AI, Ollama (local LLMs)
Tooling	Git, JetBrains IDEs, Figma, GitHub Copilot, MS Azure DevOps

EDUCATION

Applied Informatics Slovak University of Technology (STU)	2020 – 2021
Applied Informatics Masaryk University	2013 – 2016
Secondary School – Bilingual (SK/EN) Bilíkova 24, Bratislava	2005 – 2013
State exams: English (B2+), Slovak, Mathematics, Social Studies.	

LANGUAGES & OTHER

Slovak — Native	English — Upper-Intermediate (B2, state exam)
Driving Licence — Category B	Hobbies — Mountain biking (cross-country, self-maintained) · Local AI projects with Ollama · Reading: historical fiction, crime & sci-fi
